April 8, 2024

The Honorable Mike Johnson Speaker U.S. House of Representatives Washington, DC 20515

The Honorable Charles Schumer Majority Leader U.S. Senate Washington, D.C. 20510 The Honorable Hakeem Jeffries Minority Leader U.S. House of Representatives Washington, DC 20515

The Honorable Mitch McConnell Minority Leader U.S. Senate Washington, D.C. 20510

Dear Speaker Johnson, Majority Leader Schumer, Minority Leader Jeffries, and Minority Leader McConnell:

The undersigned **274** community health worker (CHW) networks, CHW employers, and public health organizations write in support of the *Community Health Worker Access Act* (S. 3892). This bill would improve access to CHW services for Medicare and Medicaid enrollees, address preventable diseases<sup>1</sup> and disparities<sup>2</sup> that drive health spending, and improve the delivery of coordinated, whole-person care. **We urge members of Congress to co-sponsor this legislation and ask Congressional leaders to ensure its passage.** 

A CHW is a frontline public health worker who is a trusted member of and/or has an unusually close understanding of the community served. This trusting relationship enables the worker to serve as a liaison between health/social services and the community to facilitate access and improve the quality and cultural competence of services. A CHW also builds individual and community capacity by increasing health knowledge and self-sufficiency through a range of activities.<sup>3</sup> Other professionals who are essential members of this CHW profession with longstanding history, trust, and effectiveness include Promotoras serving Spanish-speaking populations and Community Health Representatives (CHRs) serving Tribal nations.

CHWs are in all 50 states and dozens of Tribal nations and territories, employed by health departments, health plans, hospitals, and community and faith-based organizations. Over two dozen states already recognize CHWs as professionals in state legislation and have developed clear scopes of work to integrate CHWs into Medicaid services. Over six decades of research<sup>4</sup> has demonstrated CHWs' effectiveness in managing and addressing chronic diseases,<sup>5</sup> particularly improving health in rural settings<sup>6</sup> and underserved areas, and preventing costly hospitalizations.<sup>7</sup> A randomized controlled trial of one evidence-based CHW program found a return of \$2.47 for every dollar invested, saving Medicaid \$4,200 per beneficiary each year.<sup>8</sup>

The **Community Health Worker Access Act** would improve reimbursement for Community Health Workers in Medicare and Medicaid while expanding access to community-based services for enrollees. The bill would provide reimbursement and access without copays for two new categories of CHW services for Medicare-eligible enrollees: 1) services to prevent illness, reduce physical or mental disability, and restore an individual to the best possible functional level; and 2) services to address social needs through education and referrals to health care and community-based organizations. Finally, the bill would support the work in several state Medicaid programs to expand access to CHW services through an enhanced Federal Medical Assistance Percentage (FMAP) for CHW services and through additional guidance from the Centers for Medicare and Medicaid Services (CMS).

The Community Health Worker Access Act is a critical bill to support the CHW workforce and their work to improve health outcomes through prevention, trusted relationships, and a deep understanding of local and individual needs. The bill will allow CHWs, Promotoras, and CHRs to provide holistic, person-centered support to improve the health and wellbeing of Medicare and Medicaid enrollees. We urge members of Congress to co-sponsor the *Community Health Worker Access Act* and to advance this critical legislation without delay.

Sincerely,
