

ACTION & IMPACT

Partners In Health supporters have had an immense impact, making our work curing injustices around the world possible.

We can measure this impact in numbers, such as the data you'll see throughout this report, but we hope you also see our

impact in the stories of lives saved, challenges overcome, and what's possible when people have access to the right care. We encourage you to look at the numbers in these pages as people, global neighbors, who are safe and

healthy thanks to the generosity of our supporters.

We acknowledge the challenges we're facing today as we act globally to advance health care as a human right, but our community brings us immense hope for the future.

2.9 million outpatient visits

PIH prevents, diagnoses, and treats a wide range of conditions for millions of patients worldwide.

VOICES — of — PARTNERS IN HEALTH

“Over the past decade, generosity and advocacy have supported our team and the Ministry of Health in the fight to end preventable maternal deaths in Sierra Leone. As part of our commitment to mothers and children, we are thrilled to share that the Maternal Center of Excellence (MCOE) is set to open to patients in January 2026, following the completion of construction in October 2025. This teaching and referral facility will dramatically expand Koidu Government Hospital’s campus in rural Kono district, increasing its current 48-bed maternal ward and special care baby unit to a 120-bed center that includes a cutting-edge neonatal intensive care unit. While there are many uncertainties for the communities PIH serves around the globe, it is visible progress like the MCOE, the unwavering dedication of our teams, and our ongoing partnership that fill me with confidence in our fight for global health equity.

VICKY REED

*Executive Director,
PIH Sierra Leone*

4,570
cancer patients
currently in care

PIH brings advanced cancer care to countries with limited resources by incorporating oncology programs into public health systems.

4,570 in 2024

4,180 in 2023

3,290 in 2022

13,160
safe cesarean deliveries

PIH teams around the world provide medically necessary, lifesaving C-sections for mothers who need them.

13,160 in 2024

13,060 in 2023

14,050 in 2022

42,380
patients enrolled in
mental health care

PIH provides comprehensive, community-based mental health services where they are otherwise unavailable.

42,380 in 2024

34,490 in 2023

28,750 in 2022

45,290
chronic disease patients
currently in care

PIH serves as a model for managing chronic diseases in settings of poverty through advocacy, treatment, education, and social support.

45,290 in 2024

38,410 in 2023

37,390 in 2022

9,950
MALNUTRITION
PATIENTS
CURRENTLY
IN CARE

Believing no one should die of starvation, PIH confronts malnutrition by addressing the clinical and social factors that drive hunger.

2,400
TB PATIENTS
COMPLETED
A FULL COURSE
OF TREATMENT

Our supporters are helping PIH eliminate TB—the deadliest infectious disease—through accessible, effective treatment and support.

46,120
HIV PATIENTS
CURRENTLY
IN CARE

PIH supplies life-long, lifesaving antiretroviral treatments, facilitates testing, and provides education to support the treatment and prevention of HIV.

VOICES of PARTNERS IN HEALTH

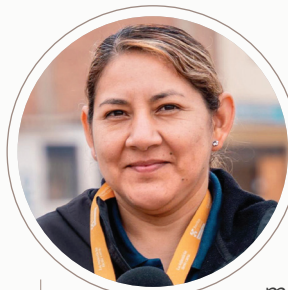

“Eliciting structural change is core to PIH’s history and mission.”

We’ve all been inspired by how PIH’s care delivery work can create new political possibilities. However, there are many steps between care delivery and meaningful policy change, which require a deliberate process of developing and executing strategies to build and leverage power to change specific policies and conditions that improve people’s lives. This is what our advocacy team is tasked with and what our supporters help us make possible.”

JOEL CURTAIN

Senior Director of Advocacy
Global Policy and Program

“I enjoy making a direct difference in people’s lives and bringing services closer to the communities that need them most. Through our work,

we can see how patients recover thanks to the support, care, and continuous follow-up we provide. In recent years, our team has been able to adopt new technological innovations, including the use of artificial intelligence for taking chest X-rays, that help fight against tuberculosis (TB). These advancements make it possible for our teams to better detect and diagnose TB in the most vulnerable and hard-to-reach communities and provide shortened preventive treatment for TB patients.”

ANA KARINA MILLONES GOMEZ

Project Coordinator, TB Program
Socios En Salud, PIH Peru

MOMENTS OF IMPACT

In 2024, we triumphed over adversity, provided lifesaving care, and experienced shared moments of joy along the way. Get a glimpse of some of the moments PIH donors and partners made possible this year:
